Mail your gear to us and we will return it within one business day.

INDIVIDUAL SALES

FULL SET

Hockey
Football
Lacrosse
Baseball
Softball
Motor Sports

SINGLE ITEMS

Figure Skates
Helmets
Gloves
Cleats

Recent findings have identified staph infections as serious medical conditions. Increasingly new strains have proven resistant to antibiotics. The Center for Disease Control (CDC) and the National Athletic Trainers Association (NATA) have both issued recommendations for schools to routinely clean sports equipment in response to outbreaks of MRSA.

Sani Gear

**DISINFECTS SPORTING
EQUIPMENT FOR
INDIVIDUALS,
TEAMS,
SCHOOLS
AND
LEAGUES**

THE PROBLEM

The foul odors associated with sports equipment are caused by perspiration and mucus that have soaked deep into the fibers of the gear.

The mix of proteins and organic matter causes the distinctive odor. This is an ideal breeding ground for the the growth of bacteria, mold, and fungus. Organisms enter the body through cuts and abrasions causing serious infections.

If your equipment smells awful, it has already been infested with these foul contaminants. Simply airing out equipment does little to combat the health risk.

THE SOLUTION

- SaniGear pumps ozone gas at a powerful rate penetrating the dense fibers of your sports equipment.
- Ozone works 3,000 times faster and is 50% more effective than bleach.
- The process kills 99.9% of mold, mildew, bacteria and germs on contact.
- Ozone has been proven to kill over 130 bacteria, viruses, fungi, mold, and protozoa.

***Be Pro-active Not Reactive
About Your Health!***

**DISINFECT YOUR
EQUIPMENT REGULARLY**

THE PROCESS

- Sani Gear is a dry process allowing equipment to be worn immediately following treatment.
- Sani Gear is chemical, detergent, and water free.
- Drop off your equipment, receive a claim ticket, and arrange a convenient pick-up time.

- Twenty-minute cycle disinfects entire set of equipment.
- Mail order, pick-up, and drop off service available for volume orders.
